Art Unit: 2665

1. Claim 38 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 38, line 4, it is unclear as to what "contract between a provider of said program" means since it requires two objects for using the term of "between".

2. Claims 39-43 and 48 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the input or the source of input to the information output apparatus since the information output apparatus cannot generate the Audio Visual (AV) data by itself according to the specification disclosure.

3. Claims 44-46 and 49 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the input receiving step since the device for carrying out the method cannot generate the Audio Visual (AV) data by itself according to the specification disclosure.

4. Claims 48 and 49 recites the limitation "said program" in line 2. There is insufficient antecedent basis for this limitation in the claim.

5. Claims 38-46, 48 and 49 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. Claims 33-37 and 47 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2665

Harvey et al. is additionally cited to show the feature of programming communication between central control system and receiver stations, providing restriction of broadcast programming for viewing and/or recording similar to the claimed invention.
